

## **Educational Objectives of the Management Information Systems Program**

1. Prepare graduates capable of analyzing organizational and institutional problems using principles and models of information systems.
2. Enable graduates to design, manage, and secure computer-based information systems that efficiently support organizational operations.
3. Develop graduates' skills in effective communication, as well as professional and ethical awareness within information systems environments.
4. Prepare graduates to work effectively within multidisciplinary teams to support the achievement of organizational goals.
