

Vision and Mission of the Computer Science Program

Program Vision:

To achieve excellence and leadership in computer science education and research by preparing scientifically and professionally qualified graduates who are capable of innovation, competitiveness, and effective contribution to the knowledge-based economy and sustainable development.

Program Mission:

To provide distinguished academic education in computer science based on solid scientific foundations and modern practical applications, aiming to develop analytical thinking, problem-solving, and scientific research skills, while promoting professional ethics and teamwork, and preparing graduates who can keep pace with technological advancements and serve society and the labor market.
