**Placement :**

**Instructor:**

**Course Description :**

This course aims at providing students with knowledge and skills required for assessment of individual's health status during health and illness throughout their life cycle. Students are directed to use effective communication skills to collect data about health history required for the performance of physical examinations based on the functional health patterns that affect the individual's health status. Knowledge from medical sciences and critical thinking are used to determine any health alterations of the individual.

**General objectives :**

1. Assess the physical, psychological, social and spiritual health status of individuals.
2. Assess the factors which are directly and indirectly affecting individual health by:
3. State the significance of the history in the identification of patient problems.
4. Identify the essential components of patient history.
