2. وصف المساق (Course Description)

The content of this course focuses on the process of decision making in managing the care of critically ill patients. Content will include educating and examining the responses of the critically ill patients. Content will reflect the biopsychosocial and spiritual realm, thereby enabling the nursing students to provide for the physical, cognitive, psychological, emotional, social and spiritual needs for both; the critically ill patients and their families. The critically ill patients require a comprehensive care through collaborative practice or care to achieve a better outcome.

The relationship between all clinical events and activities and their impact on the client's journey through the health continuum that defines the role of the critical care nurse will be addressed. A major focus of the course will be the development of the process of integration of scientific data into a meaningful whole to manage patient care. Also application of nursing process, reinterpretation of new information or values and interpretation of the latest research findings will be emphasized in the process of managing care of those patients
