3. المساق (Course Description)

4. This Course focuses on local health policies that affect the health of population in Jordan. The course provides an overview of the policy making process in general and the process of nursing and healthcare policy development within the health care system. The role of nurses in the legislative/political process will be examined as well as the role of policy analysis in the formation and implementation of national health policy. Students will explore the importance of utilizing research findings for the development of evidence based policies. This course will prepare the student to function in the role of a nurse leader who will participate effectively in shaping health policies that will help in the reform of health care system.
