

Course No.	Course Title	Credits	Pre-requisite	Learning Type
0706453	Electronic Lab	1	0706452	Face-to-face
Characteristics of electronic devices including Diodes, MOSFET, and BJT; Diodes applications circuits (rectifiers, regulators, clipping and clamping circuits); BJT application and configuration circuits such as common collector, common emitter, and common base, and OP-AMP circuit applications; FET application and configuration circuits such as common drain, common source, and common gate, and OP-AMP circuit applications.
