

Course No.	Course Title	Credites	Pre-requisite	Learning Type
0706479	Design of Renewable Energy Systems	3	0706454,0706475,0706476	Face-to-face
	Wind energy conversion systems, and micro grids with hybrid power sources. Modelling and control of renewable energy sources such as wind turbine generation, solar panel and fuel cell and power electronics interfaces will be presented. Integration of renewable energy systems will be covered.
