

Course No.	Course Title	Credits	Pre-requisite	Learning Type
0706521	Economics and Management of Energy Systems	3	0704422,0706480	Face-to-face
<p>This course provides students with an overview of the fundamental concepts of economic issues and theories related to energy conversion and management. More precisely, this course examines the economics of markets for various energy sources, and their interactions with each other and with the rest of the economy. It will cover a variety of theoretical and empirical topics related to energy demand, supply, costs, prices, and consequences of energy activities.</p>
